

## SERVICE

**P**ylon offers custom design and/or small scale manufacturing services for a wide variety of applications.

Our expert staff can handle all aspects of design and manufacturing from proof of concept to final test including all required documentation.

Pylon uses software such as AutoCAD, PADS, Visual C++, and Visual Basic for our design work.

Pylon can reduce the time and effort required on your part when designing and/or manufacturing small quantities of new products.

Pylon is able to make modifications of existing products, to meet specialized requirements.
